"The CBD sector is poised for rapid growth, with the UK being one of the world's largest and fastest growing markets for CBD products. Voyager is looking to capitalise on the forecast growth and ongoing regulatory changes in the UK CBD market, which is forecast to surpass the value of the entire herbal supplements market and be worth more than £1bn by 2025. Voyager has already developed a range of life brands and skincare products which are now generating revenue through a number of distribution channels, including specialist retailers and mainstream online platforms.

"We are delighted to witness today's successful listing and to have participated in the pre-IPO funding. We look forward to seeing more positive developments at Voyager. Voyager was the second investment made by Greencare since its own IPO on the Aquis Growth Exchange and the Company is currently assessing an exciting, ever increasing pipeline of other potential transactions."
